

Welcome to Plant Saver.

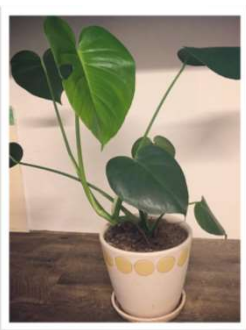

We're so excited, we wet our plants!

plant-saver.herokuapp.com

1

Why do bad things happen to good plants?

What goes wrong with plants?

- Not watering enough
- Watering too much
- Not enough sun
- Too much sun

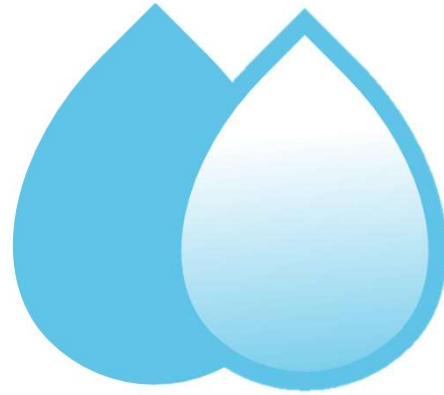

2

Users be wanting things

As a user, what do I want?

- A place to store basic information about my plants
- A record of the last time my plant was watered
- A way to track when my plant is next due for water
- A simple, user-friendly site that looks good

3

What's a MERN?

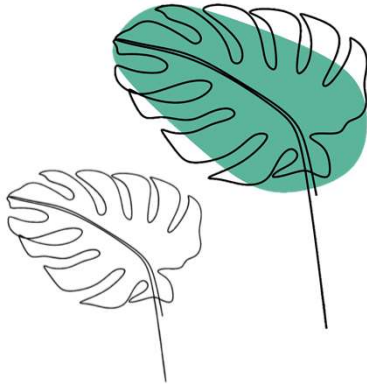

Technology used:

- | | | |
|------------|--------------------|--------------------|
| • MongoDB | • Axios | • Bootstrap |
| • Mongoose | • React-Datepicker | • Heroku |
| • Express | • React-Select | • Github |
| • React.js | • React-Moment | • mLab |
| • Node.js | • React-Slidedown | • Create-React-App |

5

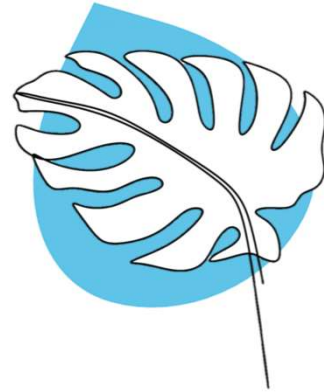

STOP. Demo time.

6

What's the in future?

How does the site improve?

- Mark off entire areas as watered, not just individual plants
- Custom values of watering cycle
- Filter plant listing
- Photo uploads for watching the plant's growth
- Tracking of plant feed, fertiliser, pest treatment etc.
